Yesterday we strike a blow against local parliament building in Bandung, West Java. Armed with propane bomb and molotovs, we managed to destroy huge part of the building resulting in wildfires that destroy most of their archives. During endless demonstration against the newly labour law, where most of the protesters are consisting of movement brokers, wanna-be politician, social anarchists, we choose to strike at a different place. As we will never beg or demand the so called rights from the powers that be. This action is dedicated to Alfredo Cospito,

Toby Shone, Monica and Fransisco, Chilean and Greek anarchists imprisoned, and to all anarchist insurgents everywhere!

For Anarchy and destruction of the existent
